NWB’2016
Poster booster minute-madness session
(Conference dinner)

• 18:30 onwards at Restaurant SULT
  • If you have signed up; ask Birger

• Take S-train to Nørreport
  • Line A to Farum
  • Line E to Hillerød
  • 4th stop

To get to SULT from the conference venue, walk to the Sydhavn train station, which takes about 7 minutes (see the map below).

From Sydhavn station, you should take an S-train to Nørreport station. You can take either the [A] line in the direction of Farum or the [E] line in the direction of Hillerød.
Conference dinner

• From Nørreport walk through the Medieval streets to the restaurant (~7 mins)

• Might be time to pass by your hotel – or pop in at a bar for a beer
Poster booster 1½ minute-madness session

Rules

• Quick-fire round to introduce short papers and attract audience
• One single slideshow, controlled by chair
• Title + one slide
• Exactly 90 seconds(!)
• Followed by poster session and coffee

Janne Pölönen
The Federation of Finnish Learned Societies
This study takes a bibliometric approach to the profile and publishing productivity of foreign researchers in Finnish universities.

The data consists of national research database of universities and the personnel and publishing information collected from universities in 2012–2014 by the Ministry of Education and Culture.

Publishing productivity is measured by using the following indicators:

a) scientific publications per person-years
b) publication score per scientific publications.

Main results: The differences between publishing productivity of Finnish and foreign researchers are modest and smaller than expected in the light of previous research. However, foreign male researchers outperform Finnish (male and female) researchers at the career level of professors and research directors.
Effects of accountability: How performance-based evaluation systems affect research practices, publication practices, disciplinary norms, and the subjectivation of scholars at the faculties of humanities and theology at Lund University

Jonatan Nästesjö
Lund University
Effects of Accountability

• Government as “the conduct of conduct”
  – Functions by moulding the capacity of individuals to govern themselves.

• Research evaluation systems as a technology of government
  – How these systems are producing a field of realities that scholars must act upon as they constitute themselves as a successful academic subject.

• Mixed-methods approach
  – Bibliometric studies and qualitative interviews.

• How do the implementation of research evaluation systems affect scholars in the humanities?
  – Analyse how general changes in academia and the use of evaluative practices are mutually constitutive.

Do physicians continue to publish internationally after PhD defense?

Lorna Wildgaard  
Royal School of Library and Information Science University of Copenhagen

Kim Wildgaard  
Department of Anaesthesiology Næstved Hospital
The number of publically funded PhDs has doubled from 4,700 to 9,700 over the last 10 years.

The Danish government annually allocates 4 billion Danish kroner to the three-year PhD program each year.

Continued investment is important for the success of the Danish knowledge economy that is striving for increases productivity and international visibility.
